Project Design
Phase-I
## Solution
Architecture

Team ID	PNT2022TMID20970
Project Name	Project - Virtual Eye - Life Guard for SwimmingPools to Detect Active Drowning
Maximum Marks	4 Marks

Solution Architecture:

Solution architecture is a complex process – with many sub-processes – that bridgesthe gap between business problems and technology solutions. Its goals are to:

- Find the best tech solution to solve existing business problems.

- Describe the structure, characteristics, behaviour, and other aspects of thesoftware to project stakeholders.

- Define features, development phases, and solution requirements.

- Provide specifications according to which the solution is defined, managed,and delivered.

Example - Solution Architecture Diagram:

Architecture and data flow of the patient who drowns in swimmingpools
